

Giao Nguyen

BUSINESS INTELLIGENCE DEVELOPER · ANALYTICS ENGINEER · DATA ANALYST

Ho Chi Minh City · GemmyNQ@gmail.com · +84 908 367 304 · [gemmynguyen.github.io](https://github.com/gemmynguyen) · linkedin.com/in/giao-nguyen

I build the dashboards, data models, and pipelines behind good reporting, in Power BI, SQL, and Python. Ten years in analytics for brand and leadership teams means I do more than visualize: I turn business questions into metrics, shape messy data into clean models, and build reporting people actually use.

CORE SKILLS

Proficient: Power BI · DAX · Power Query · Power Pivot · Excel · Data modeling

Working knowledge: SQL · Python · Microsoft Fabric · Streamlit · ETL & pipelines · Deneb (Vega) · NLP · LLM integration

Analyse & deliver: Quantitative analysis · Survey & unstructured data · Requirements gathering · Stakeholder delivery · Data storytelling

Domains: FMCG brand & category · Consumer insights · Market research

SELECTED PROJECTS

Blink ↗ · Automated analytics market research platform 2026

Turns raw survey data into a finished, insight-led Power BI report, and adapts to any study type from one codebase instead of a bespoke report per project. Run end to end from a Streamlit app.

The engine: T-SQL reshapes any survey structure into reusable star schemas, so the model is built once, not per project.

The brain: a 3-pass LLM writes the report's narrative from the published model, never the raw data, so it can't invent a number.

The visuals: reusable Deneb (Vega) templates, including charts Power BI can't draw natively (funnels, bipolar scales, box-and-whisker).

Olist Commerce Explorer ↗ · Microsoft Fabric · T-SQL · DAX · Python · Streamlit 2026

An end-to-end Microsoft Fabric build on 96,000+ e-commerce orders: raw CSVs through a medallion Lakehouse and Warehouse to a Direct Lake star schema and Power BI report, plus a plain-English AI-chat layer that answers ad-hoc questions.

The pipeline: nine raw files to silver views and gold star-schema tables in T-SQL, with the fact-grain split (order vs line-item) that keeps delivery and review averages honest.

Every query on screen: the chat layer writes its own T-SQL, runs it read-only, and shows the SQL behind each answer. A number you can't trace is a suggestion, not an answer.

REDLINE: Player Sentiment Intelligence ↗ · Python · SetFit · Power BI · DAX 2026

Classified 12,640 Google Play reviews across three racing games, then split a 0.74-star rating decline into genuine quality drop versus complaints crowding out praise.

Unstructured to structured: a multilingual NLP model (SetFit) tags sentiment and themes across thousands of free-text reviews, surfaced in a Power BI view.

LexEuropa: Legal Case Performance ↗ · Power BI · DAX · ZoomCharts · FP20 Challenge 39 2026

A three-page executive Power BI report built to an external brief and a fixed deadline: where the value comes from, who delivers it, and which cash is stuck, each page at a different time grain.

EXPERIENCE

Senior Research Manager, Kantar Insights Vietnam

2022–2026

Led the team's reporting-automation and BI workstream alongside the core research role.

I built the dashboards and automated reporting the business ran on, and piloted AI adoption in analytics. Alongside that, I ran quantitative studies end to end for multinational clients, turning stakeholder requirements into insight that drove decisions, with client satisfaction consistently at 4/5 or above.

Leadership sales dashboard: live project status, revenue, and pipeline for the weekly leadership meeting (Power BI).

Brand-health tracking: automated dashboards that cut reporting turnaround by 80%+ (Power BI / Power Pivot).

Project reporting: reusable PowerPoint auto-generation that scaled across studies (Excel Macro).

Career Break, Self-directed learning

2020–2022

Building English fluency, alongside illustration and creative writing (personal blog).

Strategic Manager, Unilever Vietnam

2016–2020

Found category growth opportunities by analysing data from many sources through structured frameworks, then partnered with sales, marketing, finance, and the executive board to turn them into growth strategy across Personal Care and Home Care.

Researcher, Global Insight & Analytics, SDL Technologies

2016

Turned high volumes of unstructured social-listening verbatim (posts and comments) into structured, quantified insight for clients, and improved the data-cleaning and analysis process.

Associate Research Manager, TNS (now Kantar)

2013–2016

Ran quantitative brand-tracking studies and built automated brand-tracking scorecards in Excel (macros). Coached internal and client teams on research methodology.

Earlier, VASC · HSBC

2010–2012

Budgeting and competitive research (VASC); consumer-loan operations (HSBC).

EDUCATION

Bachelor of International Business Economics, Foreign Trade University, Vietnam · GPA 8.02

CS50's Introduction to Programming with Python, CS50 (Harvard University), online ↗

LANGUAGES & INTERESTS

Vietnamese (native) · English (fluent, TOEIC 885 / TOEFL iBT 93)

Classical piano and violin · digital drawing · creative writing
