

APAC BRAND HEALTH TRACKER

Alpha Quarterly Brand Health Review

Rich in heritage, but stalled by price and dated perception.
Alpha must transform its static trust into dynamic, modern appeal to reignite the path to purchase.

Brand Perceptions

How Alpha is perceived across personality, value, image, and competitive brand ratings.

Alpha's trust and quality run deep, but Beta owns modern and innovative — the two traits reshaping what buyers value.

EXPLORE THE DETAIL

BRAND IMAGE

Q6 · Brand Image Associations

Alpha owns the family trust and quality territory outright. Beta locks down modern and innovative, the two traits Alpha can't claim.

COMPETITIVE BRAND RATINGS

Q23 · Competitive Brand Ratings

Alpha holds its own on quality and value, but its innovation score just slipped.

BRAND PERSONALITY

Q16 · Brand Alpha Personality Dimensions

Alpha reads as accessible and premium, but buyers clock it as old-fashioned and traditional.

VALUE FOR MONEY

Q18 · Value for Money Rating for Brand Al...

Buyers rate Alpha's value the same as they did at the start — stuck, as the category grows more price-conscious around it.

Q6 · Brand Image Associations

Brand Relationship

How buyers feel about Alpha — satisfaction, trust, emotional connection, and what drives affinity or criticism.

Alpha leads on experience and owns trust, but satisfaction erodes while innovation criticism keeps climbing.

EXPLORE THE DETAIL

OVERALL SATISFACTION

Q10 · Overall Satisfaction with Brand Alpha

Satisfied buyers are drifting toward the middle while the dissatisfied end quietly fills — Alpha's approval is eroding from both sides.

BRAND TRUST

Q19 · Trust Level in Brand Alpha

Alpha's trust score sits exactly where it started — neither earned nor lost over time.

EMOTIONAL CONNECTION

Q22 · Emotional Connection with Brand Alpha

Alpha sparked a real lift mid-year, then flatlined — buyers feel warmth but not enough to keep growing.

BRAND AFFINITY

Q24 · What Consumers Like About Brand Alpha

Consistent quality and trust are pulling further ahead as the reasons buyers choose Alpha.

IMPROVEMENT DRIVERS

Q25 · Areas for Improvement for Brand Alpha

Innovation fatigue leads every criticism Alpha hears — and it keeps climbing while other complaints fade.

BRAND EXPERIENCE

Methodology & Definitions

How this study was conducted, weighted, and tested

Data collection

Online survey among category buyers aged 18+, fielded quarterly across four APAC markets.

Sample & waves

Wave	N
Q1 2024	800
Q2 2024	800
Q3 2024	800
Q4 2024	800
Total	3200

Weighting

Rim (iterative) weighting to population targets on country, gender and age. Profile page shows the unweighted achieved sample; all other pages weighted.

Significance testing

Two-tailed t-tests between subgroups. UPPERCASE letters = 95% confidence, lowercase = 90%. Bases below 30 are not tested. Missing codes excluded.

Key definitions

T2B / B2B

Top-2-box / Bottom-2-box — the two most positive (or negative) scale points combined.

BIP (Brand Image Profile)

Association vs expected, from a logit correspondence model. Positive = over-indexed on that attribute.

Weighted mean

Scale scores averaged using survey weights; effective base via Kish formula for significance.

Base

Unweighted respondents answering each question; shown per visual.
