

SNACK-BAR CONCEPT TEST

Vietnam Snack-Bar Concept Test: Demand and Differentiation

Concept A is the clear winner on taste and intent.
But price resistance and a fractured age profile mean no single concept converts everyone.

Category frequency

Overall Preference

Overall liking, purchase intent, and first-choice ranking across the four concepts.

Concept A wins on every metric that counts, but age fractures the field — no concept owns all buyers.

EXPLORE THE DETAIL

OVERALL LIKING

QLP1 · Overall liking

Concept A earns clear top marks — the other three concepts trail at a distance, with Concept C falling well short of the field.

PURCHASE INTENT

QLP2 · Purchase intent

Concept A converts far more buyers than any rival — Concept C's distinctiveness doesn't translate to the shelf.

CONCEPT RANKING

Q10 · Concept ranking

Concept A dominates among younger buyers, but older groups split their first choice between B and D — no concept wins every age.

CONCEPT PREFERENCE

Q11 · Preferred concept

Each concept owns a different generation — younger adults claim Concept A while older audiences pull toward Concept B.

QLP1 · Overall liking

Among: asked respondents

% Distribution

Significantly higher (UPPERCASE = 95%, lowercase = 90%) vs. lettered subgroup.

QLP2 · Purchase intent

Among: asked respondents

% Distribution

Significantly higher (UPPERCASE = 95%, lowercase = 90%) vs. lettered subgroup.

Q10 · Concept ranking

Among: asked respondents · multiple responses

Driver Map - n=600

First-choice share by Age group

	18-24 (A)	25-34 (B)	35-44 (C)	45+ (D)
Concept A	52 BcD	41 D	41 D	22
Concept B	12	21 A	16	33 AbC
Concept C	12	21 A	21 A	20
Concept D	23	17	22	25
Base	188	202	139	71

Significantly higher (UPPERCASE = 95%, lowercase = 90%) vs. lettered subgroup.

Q11 · Preferred concept

Among: asked respondents · single response

Top Response

Concept A · 40%

% Distribution

% Distribution by Age group

	18-24 (A)	25-34 (B)	35-44 (C)	45+ (D)
Concept A	52 BcD	41 D	41 D	22
Concept B	12	21 A	16	33 AbC
Concept C	12	21 A	21 A	20
Concept D	23	17	22	25
Base	188	202	139	71

Significantly higher (UPPERCASE = 95%, lowercase = 90%) vs. lettered subgroup.

Concept diagnostics

Diagnostic ratings and purchase drivers mapped across the four concepts to reveal where each wins and where each falls short.

Four concepts, four distinct identities — but uniqueness without desire leaves Concept C stranded.

EXPLORE THE DETAIL

CONCEPT UNIQUENESS

QLP3 · Uniqueness

Concept C owns the uniqueness space outright — but three-quarters of buyers finding it distinctive haven't made it a favourite.

PRODUCT DIAGNOSTICS

QLP4 · Product diagnostics

Taste crowns Concept A, health belongs to Concept C — but no concept wins across the board.

REASONS TO BUY

QLP5 · Reasons to buy

Each concept wins a different purchase driver — taste, value, health, and looks carve the field into four distinct identities.

QLP3 · Uniqueness

Among: asked respondents

% Distribution

Significantly higher (UPPERCASE = 95%, lowercase = 90%) vs. lettered subgroup.

QLP4 · Product diagnostics

Among: asked respondents

Diagnostic profile: attribute × concept
color = deviation from grand mean (green above / red below)

	Concept A (A)	Concept B (B)	Concept C (C)	Concept D (D)
Tastes great	4.05 BCD	3.42 C	2.85	3.62 BC
Has a pleasant texture	3.97 BCD	3.49 C	3.02	3.59 bC
Looks appealing	3.81 BC	3.28	3.22	3.96 ABC
Has an appealing aroma	3.53 BC	3.29 C	3.03	3.96 ABC
Is a healthy choice	2.70 D	3.17 AD	4.15 ABD	2.41
Is the right portion size	3.40 CD	3.67 ACD	3.20	3.20
Base	600	600	600	600

Significantly higher (UPPERCASE = 95%, lowercase = 90%) vs. lettered subgroup.

QLP5 · Reasons to buy

Among: asked respondents · multiple responses

Concept A	Concept B	Concept C	Concept D
Tastes great · 61%	Good value for money · 63%	Healthy / nutritious · 70%	Appealing look · 61%

% Select

Significantly higher (UPPERCASE = 95%, lowercase = 90%) vs. lettered subgroup.

Consumer Voices

Open-ended likes, improvement themes, and price expectations across the four concepts.

Taste earns praise across every concept, but price friction and distinct functional gaps keep each from converting fully.

EXPLORE THE DETAIL

CONCEPT LIKES

QLP7 · Likes (OE)

Each concept earns praise on different terms — taste leads everywhere, but packaging, crunch, and restraint on sweetness each belong to a different concept alone.

IMPROVEMENT THEMES

QLP8 · Improvements (OE)

Each concept earns its own distinct criticism — health for D, size and crumble for A, dry texture for C, price for B.

OPEN-ENDED FEEDBACK

Q12 · Overall feedback

Younger respondents find the concepts exciting but expensive — price concern cuts across age groups, just loudest at the edges.

EXPECTED PRICE

QLP6 · Expected price

Concept A commands the highest price expectations — and the widest spread of opinion about what it's worth.

QLP7 · Likes (OE)

Among: asked respondents · multiple responses

Concept A	Concept B	Concept C	Concept D
Great Taste/Flavour · 75%	Great Taste/Flavour · 72%	Great Taste/Flavour · 64%	Great Taste/Flavour · 73%

% Select

Significantly higher (UPPERCASE = 95%, lowercase = 90%) vs. lettered subgroup.

QLP8 · Improvements (OE)

Among: asked respondents · multiple responses

Concept A	Concept B	Concept C	Concept D
Too Small/Crumbly · 21%	Too Expensive · 25%	Not Healthy Enough · 22%	Not Healthy Enough · 30%

% Select

Significantly higher (UPPERCASE = 95%, lowercase = 90%) vs. lettered subgroup.

Q12 · Overall feedback

Among: asked respondents · multiple responses

Top Themes Ranked - n=223

Themes by Age group

	18-24 (A)	25-34 (B)	35-44 (C)	45+ (D)
Would try the winner	25	29	40	15

SELECT THEME →

All

Resp ID	Assigned Themes	Verbatim Quote
20001	Good variety	Nothing else to add.
20003	Good variety	Nothing else to add.
20005	Would try the winner, Good variety, Prices feel a bit high	Would try the winner , prices feel a bit high.

Significantly higher (UPPERCASE = 95%, lowercase = 90%) vs. lettered subgroup.

QLP6 · Expected price

Among: asked respondents

Expected Value

box = inter-quartile range · line = median · diamond = mean · whiskers = P10–P90

Significantly higher (UPPERCASE = 95%, lowercase = 90%) vs. lettered subgroup.

Methodology & Definitions

How this study was conducted, weighted, and tested

Data collection

Online survey among category buyers aged 18+ in Vietnam.

Sample

Concept	N
Concept A	600
Concept B	600
Concept C	600
Concept D	600
Total	600

Weighting

Rim (iterative) weighting to population targets on country, gender and age. Profile page shows the unweighted achieved sample; all other pages weighted.

Significance testing

Two-tailed t-tests between subgroups. UPPERCASE letters = 95% confidence, lowercase = 90%. Bases below 30 are not tested. Missing codes excluded.

Key definitions

T2B / B2B

Top-2-box / Bottom-2-box — the two most positive (or negative) scale points combined.

Weighted mean

Scale scores averaged using survey weights; effective base via Kish formula for significance.

Base

Unweighted respondents answering each question; shown per visual.
