I build interactive dashboards and automated reporting systems. Ten years analysing data for brand and leadership teams means I build dashboards that *answer the real questions*, not just show numbers.

FEATURED PROJECT

Blink ↗ · Automated Analytics Platform for Market Research · Self-directed BI Sabbatical 2026

One automated engine that turns raw survey data into insight-led Power BI reports, adapting to any study type instead of one bespoke report per project, and driven end to end from a single Streamlit app.

The engine — A T-SQL transformation engine that converts complex survey structures into reusable star schemas optimized for Power BI. A flexible data model capable of supporting different questionnaire structures without project-specific redesign.

The brain — 3-pass LLM commentary system that reads the published data model and writes the report's narrative (themes, per-question/section headlines, and cover thesis).

The visuals — Reusable chart templates using Deneb (Vega) visuals with the right shape per question, scale-agnostic color, in-spec computation, and chart types native Power BI can't draw (funnels, bipolar scales, box-and-whisker plot).

EXPERIENCE

Senior Research Manager, Kantar Insights Vietnam 2022–2026

Led end-to-end quantitative research studies for multinational clients, from research design and analysis to delivering actionable insights that informed strategic business decisions. Beyond the core roles, led the local automation workstream and piloted AI adoption in data analytics and reporting. Built Power BI dashboards that reduced reporting turnaround time by over 80%, improving efficiency and scalability.

Strategic Manager, Unilever Vietnam 2016–2020

Identified category growth opportunities by analysing data from multiple data sources; partnered with sales, marketing, finance, and the executive board to turn them into growth strategies across Personal Care and Home Care BU.

Associate Research Manager, TNS (now Kantar) 2013–2016

Ran quantitative studies and built brand-tracking scorecards in Excel, automated with macros.

Earlier, SDL · VASC · HSBC 2010–2016

Social listening, competitive research, and consumer banking operations.

SKILLS

Build — Power BI · Power Query · DAX · SQL · Python · Streamlit · Deneb (Vega) · Power Pivot

Automation & AI — End-to-end pipeline orchestration · Reporting automation · LLM integration

Analyse — Quantitative research · Multi-source analysis · Executive data storytelling

Domains — FMCG brand & category · Consumer insights & survey data

EDUCATION

Bachelor of International Business Economics, Foreign Trade University, Vietnam · GPA 8.02

Certificate of Completion: CS50's Introduction to Programming with Python, CS50 (Harvard University), Online ↗

LANGUAGES

Vietnamese (native) · English (fluent - TOEIC 885/ TOEFL iBT 93)
