

Giao Nguyen

BUSINESS INTELLIGENCE DEVELOPER · ANALYTICS ENGINEER · DATA ANALYST

Ho Chi Minh City · GemmyNQ@gmail.com · +84 908 367 304 · [gemmynguyen.github.io](https://github.com/gemmynguyen) · linkedin.com/in/giao-nguyen

I build interactive dashboards and the data models and pipelines behind them (Power BI, SQL, Python). Ten years turning data into decisions for brand and leadership teams means I do more than visualize: I translate business questions into metrics, shape messy and unstructured data into clean models, and deliver reporting people actually use. I *answer the real question*, not just show numbers.

CORE SKILLS

Proficient — Power BI · DAX · Power Query · Power Pivot · Excel · Data modeling

Working knowledge — SQL · Python · Reporting automation & pipelines · ETL · Deneb (Vega) · NLP / sentiment analysis · LLM integration

Analyse & deliver — Quantitative analysis · Survey & unstructured data · Requirements gathering · Stakeholder delivery · Data storytelling

Domains — FMCG brand & category · Consumer insights · Market research

SELECTED PROJECTS

Blink ↗ · Automated analytics platform for market research 2026
One automated engine that turns raw survey data into insight-led Power BI reports, adapting to any study type instead of one bespoke report per project, driven end to end from a single Streamlit app.

The engine — a T-SQL transformation engine that converts complex survey structures into reusable star schemas optimized for Power BI, without project-specific redesign.

The brain — a 3-pass LLM commentary system that reads the published data model and writes the report's narrative (themes, per-section headlines, and cover thesis).

The visuals — reusable Deneb (Vega) templates with the right shape per question, scale-agnostic colour, and charts native Power BI can't draw (funnels, bipolar scales, box-and-whisker).

REDLINE — Player Sentiment Intelligence ↗ · Python · SetFit · Power BI · DAX 2026
Classified 12,640 Google Play reviews across three mobile racing games into themes, then decomposed a 0.74-star sentiment decline into how much was genuine quality decline versus complaints crowding out praise.

Unstructured → structured — a multilingual NLP model (SetFit) classifies sentiment and extracts themes from thousands of free-text reviews.

The dashboard — a Power BI view of sentiment trends, theme breakdowns, and the quality-versus-crowding decomposition.

LexEuropa — Legal Case Performance ↗ · Power BI · DAX · ZoomCharts · FP20 Challenge 39 2026
Three pages answering three questions a managing partner has to act on: where the value comes from, who delivers it, and which cash is stuck. Built to an external brief, with a fixed dataset and a published deadline.

The build — each page runs on a different time grain because each asks a different question; built in Power BI with ZoomCharts drill-downs and a clear executive narrative, not a data dump.

EXPERIENCE

Senior Research Manager, Kantar Insights Vietnam

2022–2026

Led the team's reporting-automation and BI workstream alongside the core research role.

Built the dashboards and automated reporting the business ran on, and piloted AI adoption in analytics and reporting. Ran end-to-end quantitative studies for multinational clients, translating stakeholder requirements into insight that informed strategic decisions, with consistently high client satisfaction ($\geq 4/5$).

Leadership sales dashboard — live project status, revenue, and pipeline for the weekly leadership meeting. Built to speed up decisions (Power BI).

Brand-health tracking — automated, interactive dashboards that cut reporting turnaround by 80%+ (Power BI / Power Pivot in Excel).

Project reporting — standardized, reusable PowerPoint auto-generation that scaled across studies and reduced manual effort.

Career Break, Self-directed learning

2020–2022

Building English fluency, alongside illustration and creative writing (personal blog).

Strategic Manager, Unilever Vietnam

2016–2020

Identified category growth opportunities by analysing data from multiple sources through structured analytical frameworks, and partnered with sales, marketing, finance, and the executive board to turn them into growth strategies across Personal Care and Home Care. Embedded the frameworks into business planning through training and coaching.

Researcher, Global Insight & Analytics, SDL Technologies

2016

Synthesized social-listening data across markets. Turned high volumes of unstructured verbatim (social posts and comments) into structured, quantified insight for clients, and improved the data-cleaning and analysis process.

Associate Research Manager, TNS (now Kantar)

2013–2016

Ran quantitative brand-tracking studies and built automated brand-tracking scorecards in Excel (macros); coached internal and client teams on research methodology.

Earlier, VASC · HSBC

2010–2012

Budgeting and competitive research (VASC); consumer-loan operations (HSBC).

EDUCATION

Bachelor of International Business Economics, Foreign Trade University, Vietnam · GPA 8.02

CS50's Introduction to Programming with Python — CS50 (Harvard University), online [↗](#)

LANGUAGES

Vietnamese (native) · English (fluent — TOEIC 885 / TOEFL iBT 93)
